IRELAND

Bromarv, the place where I was listening

Espoo, the 16th February 2015

**Dear Sirs,**

Greetings from Finland!

My name is Jim Solatie, I am 47 years old, married, a father of two lovely & lively kids and working with a marketing research company as a managing director. I work with media companies in Finland, including online media, print, tv and radio.

The 9<sup>th</sup> November 2014 was an exceptional day. The space weather (the ionosphere) was active and Irish Mass broadcasts were heard in Finland.

I received an interesting Mass on 27681 kHz as follows:

Date: Sunday, the 9<sup>th</sup> November 2014

Time: 10.00 – 10.40 hours Irish time

Frequency: 27681 kHz

Radio and antenna: Perseus receiver with a 3-element yagi antenna

Reception quality: Moderate to good reception quality

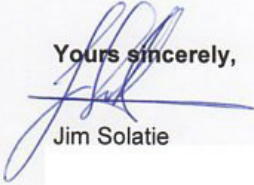

**Programme details:**

On the enclosed CD/audioclip I have recorded the Mass service at 10.04 with the beginning of the Mass, and again at 10.30 hours when the Mass was still going on and now the reception quality was quite good!

**May I kindly ask if this Mass service comes from your Church?** It would be very interesting to know if I really was able to hear your broadcast.

Thank you so much for your reply in advance. I appreciate your kindness very much!

Yours sincerely,

Jim Solatie

PS. Here in Espoo we have a DX-club called EDXK (Espoon DX-Kuuntelijat). We are some 25 active members. Besides our monthly meetings we organize DX-expeditions, DX-shows, we publish a DX-magazine jointly with other DX-clubs etc. If you will visit Finland one day, please visit Espoo and our club, too. You are most welcome!

PS2. On this picture you can see my summer cottage, where I heard your station. Antennas are on the roof.
